

Mike Kostenko

Java Software Engineer (Backend, Fintech)

contact@singledev.eu · +351 913 602 401 · linkedin.com/in/mike-kostenko · github.com/vopros21 · singledev.eu · Porto, Portugal · EU work authorisation

Summary

Java Software Engineer with 3+ years of backend and desktop development and 8 years in fintech at Devexperts (including 4+ years in QA). Oracle Certified Professional, Java SE 21. Core stack: Java 21, Spring, SQL/PostgreSQL, JUnit 5, Mockito, Swing, Git, CI/CD (GitHub Actions). Strong in testing, test performance and code review. Seeking senior backend roles, remote within the EU.

Work Experience

Java Developer, Devexperts – Porto, Portugal | Jan 2023 – Present

Developing and maintaining modules of a large-scale fintech platform across the lifecycle, from requirements to deployment.

-83% Cut unit test suite runtime by 83% by introducing concurrent test execution (Java concurrency, JUnit).

Documented the troubleshooting process in the main unit test area so that each team member could perform it efficiently and effectively.

- Analyse and implement technical requirements for backlog tasks, estimating scope and duration based on size and complexity.
- Implement code logic and provide the QA team with functional context on code changes to support effective testing.
- Review team pull requests, focusing on code quality, performance, and maintainability.
- Support deployments and releases.

QA Engineer, Devexperts – Porto, Portugal | Aug 2018 – Dec 2022

Ensuring quality and reliability of a complex fintech platform through structured testing and cross-team collaboration.

+15% Increased test coverage by 15% through automated tests (Python, Bash), significantly reducing manual effort.

Key contributor in a team that met all critical deadlines for product launches.

- Analysed and developed documentation: business/technical requirements, test cases and scenarios.
- Worked with the QA automation team to adapt test cases, validate automated tests and interpret results.
- Executed functional testing for new features and regression testing cycles.
- Developed Bash and Python scripts to automate routine QA tasks.

Projects

HubitHub | iOS app | 2024 – Present | Swift, SwiftUI, HealthKit, Spring Boot

Automatic habit tracker: pulls activity from GitHub, LeetCode, HealthKit and X, with no manual logging.

Parking Service | Web app | 2025 – Present | Spring Boot, PostgreSQL, Vite, Render

Office parking booking with half-day slots, a waitlist queue and Slack notifications.

Skills

Languages: Java (21), Swift, Groovy, Bash, Python

Frameworks: Spring, Spring Boot, REST APIs, Swing, SwiftUI, picocli

Databases: SQL, Oracle SQL, PostgreSQL, MySQL, SQLite, Liquibase

Testing: JUnit 5, Mockito, TDD

Tools: Git, Maven, Gradle, Continuous Integration/Delivery (CI/CD), GitHub Actions, Linux, JIRA, Splunk, IntelliJ IDEA, Xcode

Practices: Agile/Scrum, Code review

Certifications

Oracle Certified Professional (OCP): Java SE 21 Developer – Oracle, Sep 2025

Courses: GitHub Actions, GitHub Foundations (Microsoft Learn); 100 Days of SwiftUI (Hacking with Swift)

Education

Master's degree – Rostov State University of Transport Communication

Languages

English (C1), Portuguese (A2)
